

Medium Water Saver

Bio Gro Medium Water Saver has been thoroughly composted to produce an attractive mulch rich in organic matter and microorganisms - ensuring happy, healthy and appealing looking gardens.

Use it for

- When you want an attractive dark finish in your garden
- When you want the protection of a mulch with the added benefit of improving your soil

Key benefits

- Acts as a protective barrier, improving water retention
- Reduces weed growth
- Contains high levels of humus - encourages worms
- Increases organic matter content of the soil

Made from

- Composted Australian Radiata Pine Bark

Application

Bio Gro Medium Water Saver can be easily spread over the soil surface to the recommended depth of five to ten centimetres, using a shovel or a rake. Once in place, water thoroughly ensuring that the water is penetrating the mulch and the soil below. As with most mulches, we recommend that a radius of approximately thirty centimetres around new plantings be left unmulched.

Handling Procedure

Bio Gro Medium Water Saver contains microorganisms, therefore when spreading by hand the use of gloves is recommended. Also wash hands immediately after use.
